

OVER **100** YEARS
HAWKINS
Electric Service, Inc.
WIRED FOR SERVICE

Hawkins. Since 1918.

The trusted source for all of your electric services needs

Ever since Jay C “Pop” Hawkins rode his bicycle through Hyattsville installing electricity in his neighbors’ homes in 1918, Hawkins has served every client as if they were a neighbor. To this day, we continue our founder’s commitment to neighborly customer service and his embracement of new technology. This commitment has enabled us to grow into one of the most respected electrical contractors in the region. In 2021 we have expanded our neighborhood to the Delmarva region of Maryland and Delaware.

Service & Construction

Today, Hawkins Electric provides construction, maintenance, general electrical repairs for commercial, multi-family and residential customers across the Mid-Atlantic. We place an emphasis on customer experience, regular communication and quality work completed in a timely manner. Our highly skilled electrical technicians receive continual training in safety procedures, as well as in the operation of our state-of-the-art diagnostic equipment and preventative maintenance infrared testing equipment. Please contact us to have one of our technicians dispatched to your property or home in a fully stocked van ready to address your needs.

Capabilities Statement

- Hawkins Electric has a bonding capability of \$25,000,000 with a \$10,000,000 per job limit.
- Financial stability, long-term relationships with our financial institutions and the experience that comes from more than a century of upturns and downturns in the local economy.
- We take safety very seriously. Our Safety Committee consists of field technicians, project managers and our safety officers. We participate in the Associated Builders & Contractors (ABC) Step Awards and the Independent Electrical Contractors (IEC) Spark Awards Program. Hawkins Electric has been awarded safety awards for both IEC and ABC for 10 consecutive years.
